Available to join immediately | Valid 10-year US B1/B2 visa

PROFESSIONAL SUMMARY

Commercial and business analytics manager with 10+ years turning pipeline, campaign and customer data into revenue decisions. At Altus Group, built pipeline, ARR and risk reporting for leadership (55+ deals, CAD \$8.4M+). In six years at Adobe, built BI, funnel and campaign analytics for marketing and sales teams across APAC, EMEA and the Americas. Hands-on with Power BI, Tableau, SQL, Databricks and Salesforce, and experienced working with stakeholders from analyst to VP level. IIM Calcutta (EPBM). Targeting Revenue/Commercial Analytics, Business Intelligence, Marketing Analytics and GTM Strategy & Operations manager roles.

US EXPOSURE & TRAVEL READINESS

- **Active 10-year US B1/B2 visa:** available for business travel to the USA for client meetings, leadership reviews and corporate events at short notice.
- **Atlanta, USA (Altus Group):** part of the strategy team at the AIP Adoption Strategy Camp, where Altus launched new Argus Intelligence Platform (AIP) features, products and AI innovations. Delivered the deck that set the final adoption measures for the VAS teams, based on events tracked, pages opened, top users and best-used features.
- **Global stakeholder base (Adobe):** delivered analytics for marketing and sales teams across the US/Americas, EMEA and APAC, working across time zones.

SELECTED IMPACT

- **CAD \$8.4M+ pipeline** brought under one reporting model (55+ deals) with a false-commit-risk framework that flagged at-risk revenue early (Altus Group).
- **20% increase in client retention** and 98% client satisfaction managing high-value B2B campaign accounts (Adobe).
- **18% better funnel accuracy and efficiency** and a **10% lift in campaign ROI** through attribution rework and Salesforce-based forecasting (Adobe).
- **20% faster data processing and 30% less manual data preparation** through ETL and reporting automation (Adobe).

CORE SKILLS

Analytics & BI: Power BI, Tableau, SQL, Advanced Excel, Databricks, Python, SSIS / SSRS / SSAS, Adobe Analytics, data modelling, EDA, root cause analysis

Commercial & Revenue Analytics: Pipeline analytics, sales forecasting, ARR / bookings / renewals, upsell-downsell-churn reporting, funnel and attribution analysis, KPI frameworks, campaign measurement, competitive and account research, GTM strategy

Platforms: Salesforce CRM (Certified Administrator), Workfront, Kantata, Preqin, Jira, Argus Intelligence Platform (AIP)

Product & Delivery: Product adoption, feature and client insights, requirements gathering, stakeholder management, Agile / Scrum, executive reporting

AI: Microsoft Copilot and prompt engineering for content drafting and insight summaries

PROFESSIONAL EXPERIENCE

Altus Group | Bengaluru

Oct 2025 – Oct 2026

Commercial Strategy and Operations Manager, Valuation Advisory Services (VAS)

- Owned end-to-end VAS pipeline reporting: a five-tab Excel model covering **55+ deals worth CAD \$8.4M+**, plus two live Power BI dashboards used by leadership.
- Designed a **false-commit-risk framework** that flags deals aged 180+ days or with sparse notes, giving leadership early visibility into at-risk revenue.
- Built ARR (upsell, downsell, churn), bookings-to-revenue, renewal and weekly EAP exposure reporting with Databricks data preparation, rolled into a weekly storyline deck for senior leadership.
- Led campaign management for the Argus Intelligence Platform (AIP) adoption strategy across three flagship programs (Show & Tell, Doing It Together, Celebrating Success).
- Part of the strategy team at the AIP Adoption Strategy Camp in Atlanta (launch of new AIP features, products and AI innovations); **authored the deck defining final adoption measures for the VAS teams**, covering product-efficiency KPIs and usage metrics (events tracked, pages opened, top users, best-performing feature by team) plus the campaign designed to drive adoption.
- Delivered AIP client insights analysis across three data sources, surfacing feature underutilization that shaped product adoption and enablement priorities.
- Ran competitive and account analysis using Preqin to shape GTM positioning and account strategy for client-facing teams.

- Authored feature-level product one-pagers (e.g., Benchmark Manager, Summary of Assumptions) and executive and client-facing decks that tied each capability to a use case, its value and an adoption next step.
- Tracked campaign milestones and risks across commercial, product and sales teams with regular executive updates; used Microsoft Copilot and prompt engineering to speed up content drafting and insight summaries.

Adobe | Bengaluru

Jul 2019 – Oct 2025

Senior Business Intelligence Engineer (Senior Business & Visualization Analyst)

- Led analytics for Adobe's international marketing operations across EMEA, APAC and the Americas, building Power BI dashboards and Salesforce reports that tracked funnel and pipeline conversion from lead to opportunity close across corporate, territory and strategic accounts.
- Managed high-value B2B campaign accounts as the primary liaison between clients and internal teams: **client retention up 20%**, on-time delivery and 98% client satisfaction.
- Ran EDA and root cause analysis on conversion data, reworked the attribution model and cleaned data in Databricks, improving **marketing funnel accuracy and efficiency by 18%**.
- Built Salesforce CRM reports and dashboards using Adobe Analytics, Workfront and Tableau data for sales forecasting and campaign measurement, contributing to a **10% increase in campaign ROI**.
- Built a promotion-impact simulator showing the effect of promotions on volume across media channels, and set weekly targets and a linear funnel that teams used to focus effort.
- Built Power BI and Tableau dashboards on Databricks pipelines for real-time KPI tracking, **improving operational efficiency by 15%**; built a self-serve Media Dashboard for on-demand cross-channel performance and ran analytics on Adobe Summit ROI and conversion optimization.
- Rolled out Power BI, Tableau and MSBI across departments and reworked data models and ETL, **cutting data processing time by 20%**; automated financial reporting pipelines (SSIS, SSRS, SSAS, Databricks), **cutting manual data preparation by 30%**.
- Built financial models in Excel, Power BI and Tableau (revenue forecasts, investment scenarios, sensitivity analysis), **improving financial planning accuracy by 20%** and informing budget allocation.
- Translated requirements from stakeholders across APAC, EMEA and the US into dashboards and reporting workflows, **raising reporting adoption and accuracy by 30%**.
- Ran Scrum ceremonies in Jira for BI enhancements. Won the Star Spot Award within six months of joining.

Brillio Technologies | Bengaluru

Jun 2018 – Jun 2019

Senior Associate (Senior Analytics Consultant), analytics engagement for Dell

- Optimized Dell promotion planning across multiple countries using baseline forecasting and margin-uplift metrics, giving planners a clear view of units, revenue and margin by promotion (SQL, Excel, Tableau).
- Wrote multi-database SQL with CTEs and error handling, modelled data in MS Visio and built real-time Tableau dashboards for leadership, **speeding up decisions by 15%**.
- Cut reporting turnaround by 20% by streamlining dashboards and automating Excel work.

Cognizant Technology Solutions | Kolkata

Jan 2015 – Jun 2018

Programmer Analyst (Program Analyst), client: UPS

- Designed and maintained database schemas, ER diagrams and SQL objects (tables, stored procedures, functions, triggers, views) for data warehousing and reporting.
- Developed SSRS reports on SQL Server 2008/2012 across six domains (Sales, Client Contact, Accounting, Billing, Benefits, Insurance) and built SSIS packages feeding them.
- Led a category guidance tracker study analysing segments quarter over quarter, delivering dynamic scorecards through end-to-end data preparation and reporting.
- Managed four environments (DEV, QA, UAT, PROD) within Scrum teams, keeping releases on track.
